Oscar Cook Trial Moved To Marlin On Judge's Order

No Jurors Selected
After 150 Are
Questioned Here

Two days of questioning 150 prospective jurors failed to produce a single juror for the murder trial of Oscar F. Cook, 23, of Rogers, District Judge John C. Patterson on his own motion ordered the change of venue about 3 p.m. Tuesday and reset the trial for January 27 in Marlin.

Tuesday, the second day of the trial, 75 persons were summoned as prospective jurors, but 47 of them were excused. Twenty-four were dismissed, most of them because they said they objected to the death penalty. The defense used four more of its allowed 15 peremptory challenges.

Monday, when 75 persons were also called, 41 were excused, 30 dismissed and four challenged by the defense. The state used none of its peremptory challenges.

Cook is charged with shooting his former mother-in-law, Mrs. Dan Crow of Davilla last May 14.

He has also been indicted on three counts of assault with intent to murder in the shootings of his former wife, Mrs. Velma Cook, 23; her brother, Danny Crow, 20, and her sister, Mary Lou Crow, 15. All three recovered after being treated for gunshot wounds in the chest. They were wounded at the same time Mrs. Crow was fatally shot.

MOTIONS OVERULED

Questioning of jurors began after Judge Patterson denied four motions by the defense attorneys. The attorneys asked for a change of venue on the grounds that publicity made a fair trial impossible in Cameron; a continuance to allow time for a sanity hearing; more time to prepare the case; and more time for investigation.

Trying to seek the change of venue, defense attorneys put several persons on the stand Monday morning. They were asked questions concerning the newspaper, radio and television publicity the case had received.

Among witnesses questioned were John Henderson Jr., County District Attorney, Jack Prescott, former County attorney now of Temple, and Milam County Sheriff Carl C. Black. The three officials stated they believed Cook could receive a fair and impartial trial in Milam County.

Defense attorneys Jack Welch and Robert Peterson both of Marlin, submitted newspapers as evidence as to the publicity the case had received.

The defense attorneys were appointed by the court 12 days after Cook's first court-appointed attorney withdrew from the case. He was Charles C. Smith Jr. of Cameron.

Defense attorneys indicated in examining jurors that they might raise the sanity issue.

THIRD POSTPONEMENT

Judge Patterson's ruling for the change of venue gave the case a third continuance.

John Henderson Jr., County-Dist. attorney of Cameron, will be State's attorney in the Marlin trial. He will be assisted by Thomas B. Bartlett Jr., County Attorney of Marlin.

On October 7, the date of the original trial for Cook, the court granted a continuance when Cook changed his plea. The trial was delayed a second time when his defense attorney moved to withdraw from the case.

Heading the Library and the Fund Drive are Mildred Thornton, President of the Board of Directors; Oxsheer Smith, Chairman of the Out-of-town Fund Drive and E. A. Perrin, Chairman of the In-town Fund Drive.

LIBRARY'S GROWTH

The Cameron Public Library got its start in 1955 when the Junior Chamber of Commerce joined with the Cameron Public Library in promoting interest. The original library was housed in a frame barracks-type building located adjacent to the present Little League Field until being moved to its present location on the Courthouse Square.

In April, 1963, the approval of a \$2,500 Library Maintenance Fund referendum marked a significant milestone in the library's growth. The public endorsed the City Council to appropriate the annual maintenance fund for the library.

The City Council had already set aside a site on East Fourth Street on which to build the new library structure and later set aside \$10,000 to be used in the construction of the facility.

Santa Visits City

Annual Parade

Cameron's annual Christmas Parade drew a huge crowd last Friday as Milam Countians viewed a 20-unit parade march through the downtown area.

Santa Claus brought up the rear of the parade column. He was swarmed by children seeking to catch the candy he was throwing into the crowd, while other children were standing on the sidelines viewing Santa for the first time this year.

Chamber officials said the parade brought more people than ever before as hundreds of visitors lined the new parade route. Also many more than usual participated in the once-a-year occasion.

First place winner in the float contest was the Cub Scout troop 213. They were presented \$20 by the sponsoring Chamber of Commerce. Their float depicted the "Little Train That Could," with stuffed animals, engineer, clowns and Santa Claus.

The Bethel AME Church Float won second place and received a \$15 cash award. Their float had a biblical theme with the Virgin Mary and Christ Child facing the star of Bethlehem.

Third place went to the St. Anthony Girl Scouts. They won a \$5 cash prize. Their float also had a biblical theme on one end with the four shepherds bringing gifts to the Christ Child. On the other end, some Girl Scouts stood by the American flag.

Albert McCullin Jr., chairman of the sponsoring Trade and Development Committee, said he would like to express his appreciation to all those who helped in making the parade a success.

Two State Alert

Out To Capture Armed Gunmen

A kidnap-robbery like that of Mr. and Mrs. J. D. Lewis, at Buckholts Monday night, was re-enacted in Walters, Okla., Tuesday night according to Milam County Sheriff Carl C. Black.

Four masked gunmen, believed to be the same who terrorized the pioneer Milam County couple, struck again at the T. L. Wileman home at 7:30 p.m. Tuesday. They robbed them and left the couple and their son bound and gagged, Black said.

A two-state alert is in effect for the four armed men who are described as being extremely dangerous.

The men stole the Wileman automobile and it was found late Wednesday afternoon in De Queen, Ark. Sheriff Black said although the license was gone, the motor number coincides with the 1961 Ford model taken in Oklahoma. He said there were also some marine clothing inside the car and are possibly the ones taken from the Lewis home.

Four Texas Rangers were called into the investigation here and Jack Mercer, fingerprint expert, was at the Lewis farm home Tuesday.

A man was held for questioning Tuesday night, but Sheriff Black said he apparently was not in on the Milam robbery.

GUNS STOLEN

Milam County has been the scene of several robberies in recent days, and the description of a gun held by one of the men, as described to him by Mrs. Lewis, was similar to a rifle stolen from Wied, Hardware Saturday night. Several rifles and ammunition were taken in the robbery of the store.

Black said Mrs. Lewis, Milam County school supervisor, and her husband, now retired, both about 64, were watching television in their home located about nine miles from Cameron. About 8 p.m. they looked around to see three men wearing masks and armed with rifles.

Mrs. Lewis quoted one of the men as saying, "These people have some money and we want it."

After nearly an hour of questioning and harassment by the men, they were bound with venetian blind cords, gagged with pillow cases and forced into the couple's 1962 model automobile.

The men drove the elderly couple to an area on the banks of the Little River, about four miles away, where a fourth man joined them.

Forcing the Lewises out of the car, the quartet rebound the couple with stronger ropes and forced them into an old panel truck.

SEEK HELP

After about two hours Mrs. Lewis is managed to free herself and her husband. They walked three and one-half miles to the farm house of a Mr. Tiddle to get help.

When they were taken home by Sheriff Black, they found the men had returned to their home and ransacked every room. Furniture was overturned, drawers pulled out, closets emptied. The men had stolen radios, a typewriter, clocks, silverware, watches, Mr. Lewis clothing and the car, and took all the firearms in the house.

"You cannot imagine how horrible the ordeal was," Mrs. Lewis said. Both Mr. and Mrs. Lewis were given medical treatment for shock and exposure.

Black, who asked the assistance of the Rangers in the investigation, said the men had apparently been camping near where the Lewises were tied and abandoned. At the river bank, he found the remains of a fire, food and some racoons that had been killed.

The Sheriff said Mrs. Lewis told him that the gunmen threatened to kill them and their son if they notified the officials.

The Rangers called in are Sgt. Jim Riddle and Bill Wilson, both of Austin; Sgt. O. L. Luther of Bryan and Trent Horton of Killeen.

SUSPECTS SOUGHT

Black said he had been notified of the Oklahoma robbery and said that one of the men has been recognized and is being sought by law officials.

News About Milam County Farmers and Ranchers, Their Interests, And Activities

1964 Outlook For Agriculture Good

COLLEGE STATION - Texas farmers and ranchmen with the necessary resources - land, capital, labor and the managerial ability to combine them into an efficiently operating unit - should have a good year in 1964, believes John G. McHaney, economist for the Texas Agricultural Extension Service.

Here are his reasons. Economic activity for the nation is expected to continue at a high level during 1964. Consumer incomes after taxes are running about 5 percent above 1962 now and further gains are expected in 1964. Too, automobile sales, home building, appliance sales are expected to register further gains as are expenditures for new plants and equipment. Expenditures for goods and services by federal, state and local governments will increase in 1964 and

they now account for about a fifth of the gross national product, McHaney explains.

He points out, however, that the general economic activity will depend to a great extent upon the timing and extent of the proposed tax cut.

The domestic market for agricultural products looks good, says the economist. The immediate outlook for agricultural exports is about the best ever, he adds. Total exports of farm products for 1963-64 is likely to be near \$6 billion if the proposed grain sales to Soviet bloc countries materialize.

Farm output continues to rise and 1963 is expected to set a record high for the sixth consecutive year. With average growing conditions, farm output in '64 will remain high and could set a new record, says McHaney.

Farm Records Help

On Tax Planning

COLLEGE STATION - Considerable income tax savings may be gained by spending a little time reviewing your farm records now, says C. H. Bates, farm management specialist with the Texas Agricultural Extension Service.

A farmer's or ranchman's net income may vary considerably from year to year due to fluctuation in yields, changes in price and production costs, he explains. However, some planning by the taxpayer who pays by cash, as the farmer does, can help level out year to year income and save tax dollars, according to the specialist.

The producer must study business records before the end of December and make an estimate of the taxable income. If the prospects for taxable income appear to be high, the taxpayer may reduce it by paying for needed business items before the end of December, says Bates. Repair parts for machinery, points, seed, tires and reasonable amounts of fertilizer are some items which may be paid for in advance.

If the taxable income prospects point to a rather low figure for the year, the process should be reversed and steps taken to increase income as much as possible. This can be done by obtaining payment for all products sold through December and carrying some repair and other maintenance costs over to January, with the hopes that next year's income may be more favorable.

Some farmers pay more taxes than they should because they fail to take advantage of depreciation on purchased livestock, Bates continues. Depreciation also provides an important tax management opportunity since new purchases of equipment items, irrigation facilities and similar items may be subjected to the 20 percent first year depreciation. Assets having a six-year useful life, and not in the real estate category are usually eligible for this treatment, says Bates.

4-H CLUB

Notes

By Charles W. Benson

Ass't Milam County Agent
Susan Elaine Abel, daughter of Mr. and Mrs. Henry Abel of the Sharp Community, has won the Junior Fire Prevention Award of Milam County 4-H Clubs.

Since Susan joined the 4-H in 1960, she has made giant steps toward being one of the most outstanding members. Her first project was a Sears gift. This gift placed Second at the County Sears Show. Other projects include Sheep and Poultry.

In the Sharp Community Club, Susan has served as Reporter for two years and Secretary one year. She has also worked on many committees.

Fire Prevention is very important in many occupations, particularly in farming since few farmers have access to fire fighting equipment. Susan has found fire prevention an interesting project. She has inspected the house, barn and other farm buildings and has corrected many hazards.

Susan says, "Fire Prevention is something that must be practiced each day by every member of the family."

HINTS FOR HOMEMAKERS

With winter weather in the spotlight, homemakers may wish to take advantage of some of these household hints to lighten their household tasks and protect their family members.

Since winter heaters are undoubtedly making their appearances, homemakers should take extreme precautions when lighting heaters after summer storage. Heaters collect dust, lint, and cobwebs when not in use, and should be given a thorough cleaning before use.

Older people need protein for repair and upkeep of body tissue even though body growth is completed. Research shows that diets of persons over 40 years of age often lack the recommended amount of protein. Important sources are milk, cheese, eggs, meats, poultry and fish, dry beans, peas and nuts.

Exhaustive house cleaning jobs such as the time honored fall or winter house cleaning may be lightened by distributing or staggering special cleaning tasks over a period of time. For example, launder curtains when other work is light. Let equipment be your helper. Good equipment kept in good working condition makes house cleaning easier.

A vacuum cleaner is convenient for cleaning walls, carpets, rugs and upholstery. Take advantage

Jersey Cattle Club Rates Stuart Cows

Two registered Jersey cows owned by J. K. Stuart, Cameron, have been rated Tested Dams by The American Jersey Cattle Club.

The Tested Dam rating indicates that a Jersey cow has three or more progeny that have qualified themselves on one of the programs of official testing of The American Jersey Cattle Club.

The cows in the above herd that earned the distinction and the average production of their qualifying progeny are: Signal Jester Delores, Progeny, 3, Lbs. Milk, 9,675, Lbs. Fat, 495; Rusty P. R. Foxy, Progeny, 3, Lbs. Milk, 8,310, Lbs. Fat, 482.

Of the useful attachments for many of your cleaning jobs. Carpets may become dull, even with the consistent use of a vacuum cleaner. Arrangements should be made to give your carpets a professional cleaning occasionally.

You can trim 10 percent off your grocery bill by taking advantage of "specials" at the food market. To make a savings, however, these "specials" must account for a fourth of your purchase and you have to be able to use them once you've bought them.

Tested techniques for good buy-manship - including knowledge of what, when and where to buy can save money, time and energy for busy homemakers.

It is hoped these hints will help you to go through your work day a little brighter, and make your work day a little lighter.

INCOME FOR FOOD

On the basis of our disposable income the average U. S. family is spending less for food today than ever before. In 1959 we spent 20 percent, compared to about 23 percent in 1929. The Japanese spend 42 percent; West Germans, 45 percent; and Russians, 56 percent of their disposable income for food.

BIRD PROBLEM

The bothersome and sometimes destructive problem of birds in hay lofts can be solved by the use of a flashing light. A revolving cylinder with two amber and two clear

lenses placed over a 75 watt bulb will annoy the birds and drive them away. Don't burn the light at night, however, because from a distance the flashing amber and white lights make the barn appear to be on fire.

Mrs. Elley Enjoys Unusual Hobby

Mrs. Louis Elley combines a most unusual occupation with an interesting hobby to make her life full of variations.

At home she maintains a greenhouse where she specializes in the growing of African violets and orchids and in her work she holds the title of 'chick sexer'.

Her hobby is horticulture and has grown each year since she first became interested in the field. She now has over 1,000 plants in her greenhouse and numerous other plants inside her home and in her yard.

Just recently her husband, Louis Elley, built a new 20 by 20 foot fiberglass greenhouse to handle her ever increasing number of plants. She has moved all of her plants into the new structure for the winter months and will use both greenhouses come spring.

The greenhouse is the home of about 400 orchids, 330 of them Cattaya Plants, 621 violets and a number of other varieties.

VIOLET ENTHUSIAST
She began specializing in violets in 1955 because of their beauty but had hard luck with them until she just "let them go."

"I have found they require only regular watering and fertilization and not all the pampering I originally gave them," Mrs. Betty Elley said.

The first greenhouse was built by her husband in 1958 "Because every room in our house was full of plants," she said. It is complete with window fans and heating facilities, as is the new building. During the winter months she said she will store all of them in the new greenhouse due to heating and maintenance.

Caring for her plants usually takes about eight hours a week. However, during the cold months she is having to carry warm water from the house which requires much more time. When possible she uses a bucket with siphon and hose for watering and spends many hours repotting the plants.

Wanting to see how flowers progress and what stages they go through, she recently took photographs of a violet from the time the flower bud started to open for 11 days following.

"This was very interesting to me and I plan to use the information and pictures in club programs which I have been asked to present," she said.

ORCHID VENTURE
Her newest craze, which she shares with her husband, is the orchid family. Nearly all of her 400 orchid plants have just recently been purchased. She admits that this is turning into quite a bit of work and says she is selling the

It's so well engineered — you get a 5-year/50,000-mile warranty.*

What does it take to stand behind the vital moving parts of an automobile for five years or fifty-thousand miles? Just one word, Confidence. Part of it comes from the fact that Chrysler engineers have come up with more engineering "firsts" than any other car makers. Part of our confidence also comes from the kinds of things our engineers do for a car. For example, an all-welded, rust-resistant, one-piece body. Torsion-bar front suspension, the kind the experts favor. Or, the choice of V-8 engines: 361 cu. in. to 413. Add to all this, Chrysler's clean, crisp and handsome styling. Isn't this your year to move up? Why not go see your Chrysler dealer? He'll make it easy.

*Engineered better... backed by a 5-year/50,000-mile warranty with this coverage: Chrysler Corporation warrants, for 5 years or 50,000 miles, whichever comes first, against defects in materials and workmanship and will replace or repair at a Chrysler Motors Corporation Authorized Dealer's place of business, the engine block, head and internal parts, intake manifold, water pump, transmission case and internal parts (excluding manual clutch), torque converter, drive shaft, universal joints, rear axle and differential, and rear wheel bearings of its 1964 automobiles, provided the owner has the engine oil changed every 3 months or 4,000 miles, whichever comes first, the oil filter replaced every second oil change and the carburetor air filter cleaned every 6 months and replaced every 2 years, and every 6 months furnishes to such a dealer evidence of performance of the required service, and requests the dealer to certify (1) receipt of such evidence and (2) the car's then current mileage.

Take Your Problems To Church This Week

DOING SOMETHING FOR OTHERS

It is possible the reason grandfather can celebrate the first anniversary of his grandchild with unmingled joy is that he is blessed with a sound mind. His health, happiness and stability rests on the certainty that throughout his adult life he has been, and still is, doing for and serving others.

An active affiliation with a church will help build the foundation for a clear, logical thinking and sound mind. The church will help each one to discover that a vital resource for living is to know and accept the fact that others are dependent upon us for something, that we are responsible for someone. By bringing the knowledge to many that they are doing the things that matter, the Church has saved those minds from aimlessness and from agonizing futility.

Yoemen Second In Connally Meet

The Cameron Yoemen Basketball team was edged out of first place in the Connally Tournament Saturday night and took second place honors after playing fine ball and getting into the championship playoffs.

They were defeated by Connally 52-45. The Yoemen got off to a slow start and were behind 7 to 20 at the end of the first quarter. They began hitting and closed the gap to seven points when the final seconds ran off the clock.

Three Yoemen tied for high point man with Merlin Lester, Dicky Ponder and Lawrence Laffere all scoring 10 points.

ALL TOURNAMENT

Lester was named to the all

tournament team and received a gold basketball award. The team received a nice second place trophy.

In the first Yoemen basketball game Thursday, they defeated the Teague team 44 to 38. Lester was high point man with 22 points.

The Lorena-Cameron game was the surprise game of the tournament as the highly favored Lorena five went down under the Yoemen 52-51. It was a nip and tuck ball game all the way and with one second left on the clock the Lorena team received two free throws. The player missed both shots and the Yoemen won by their slim one point margin.

High point men were Laffere and Lester both with 16 points.

In the Abbott-Cameron game, the Yoemen came from behind to win 47-40. At halftime they were 11 points behind, but desire and height paid off and they closed the gap. Lester was high point man with 19 points.

YOE IMPROVED

Coach Nick Greer said the boys have "shown marked improvement

since the beginning of the season. "We have 10 boys on the varsity team and we try to play all of them in every game," Greer said and continued, "we have a good bunch of boys."

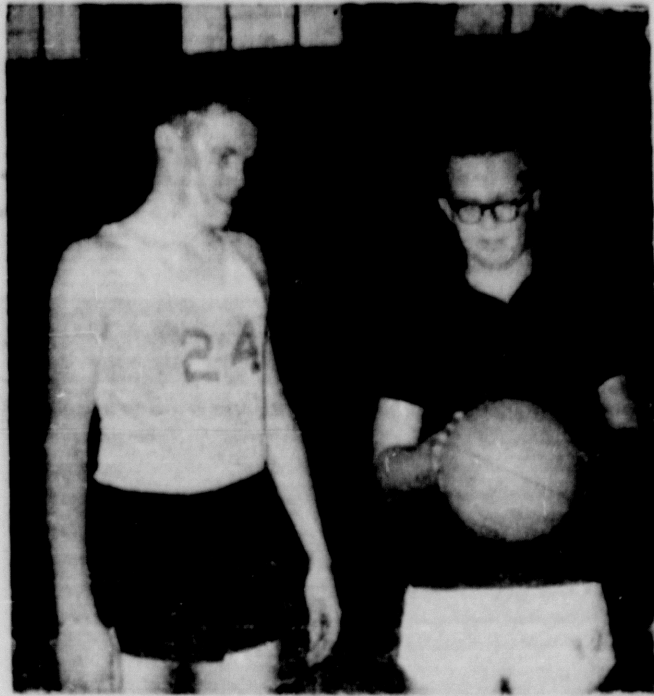

Greer said the most outstanding, or unusual game, of the tournament was the West-McGregor game. The score was West 113 and McGregor 39.

Two Cameron Men Serve Under Four U. S. Presidents

August G. Kunz, chairman of the local draft board and Lon M. Peeples, member of the draft board, have served in their capacities under four Presidents of the United States.

Both men received a citation for 15 years of "loyal and faithful" service to the United States.

Major E. A. Hoppe acted on behalf of the late President Kennedy, Gov. Connally, Lt. Gen. Lewis B. Hershey, national Selective Service Director, and Col. Morris S. Schwartz, State Director, in presenting the Presidential Awards to the men on December 4.

Coach Nick Greer and senior players, Ronnie McWilliams, discuss some basketball strategy as the season rolls into full swing. McWilliams is one of two seniors on the Yoe team. Senior Merlin Lester plays center on the squad.

NEW CHEVELLE! BY CHEVROLET

The kind of go—6 or V8—you'd expect from one of Chevy's great highway performers. Come on down and drive it.

The kind of comfort you'd expect in a large interior. Come on down and sit in it.

The kind of fresh styling—inside and out—that makes it the year's smartest surprise. Come down and stare at it.

New Chevelle Malibu Sport Coupe

Now—Chevy spirit in a new kind of car!

We built this one to do more than just stand around looking beautiful. Held its weight down in the 3,000-pound range. Then built four lusty engines—two sixes and two V8's—with output all the way up to 220 horses*!

And if that makes you think this is one frisky car, you've got the right idea.

You've also got a roomy car here. Yet its 115-inch wheelbase keeps it highly maneuverable in traffic and very easy to park.

With its Full Coil suspension, it's got a ride that reminds you of the Jet-smooth kind the

way it muffles noise and cushions bumps.

And the fine hand of Body by Fisher craftsmen shows up beneath this one's suave good looks, too.

Sound good? There's more. Like the fact that Chevelle comes in three series with eleven models—convertibles, sport coupes, sedans, wagons, even Super Sport models with front bucket seats. Like the fact that (and see if this isn't one of the nicest surprises of all) the new Chevelle comes at an easy-to-take price!

Like to hear more? The listening's wonderful at your Chevrolet dealer's—and so's the driving.

New President Sustains Continuity . .

News reports on President Johnson's first weeks in the White House show the complexity, the strain and pace facing a man who so suddenly must assume the reins of the world's most demanding job.

In two weeks, President Johnson has: —Started the task of reducing the proposed 1964-65 federal budget to \$100 billion, still higher than the present budget estimated at \$98 billion, but the least increase in five years . . . —Gained the assurance of Sen. Harry Byrd, (D-Va.) the chairman of the Senate finance committee, that a tax reduction is forthcoming sometime in 1964, retroactive to the first of the year. . . . —Started Congressional efforts to move the Civil Rights bill out of committee for a vote . . .

It is clear the President's plan to press for immediate programs in the domestic field will overshadow any work in foreign policy. This follows his strength as senate majority leader which was his springboard to a contest for the 1960 presidential nomination, won by President Kennedy, brutally assassinated in Dallas Nov. 22.

Pierre Salinger, successively press secretary for Mr. Johnson and Mr. Kennedy, reports that it seems hundreds of phone calls come from the President's office these days in his effort to gain momentum for continuity of government since the assassination.

President Johnson's tremendous drive and persuasive powers successful in establishing confidence both at home and abroad in the new Administration.

After the Warren Commission makes official the findings of the FBI and Secret Service, European reaction to the bizarre turn of events in Dallas should be stilled. It is apparent that no conspiracy has been discovered either in President Kennedy's or his accused assassin's death. But it will take the prestige of the Warren Commission to give these findings enough credibility for shocked European governments.

This final report will give the Johnson Administration a clearer field to proceed in the different role of world leader after an American president has been shot down.

President Johnson, well trained in the processes of government, is meeting these challenges.

Gov. Connally In Austin Mansion

By Vern Sanford

Austin - Gov. John Connally is "back home" in Austin, after a 13-day stay in Parkland Hospital in Dallas. He has had what he termed "amazing recovery from critical wounds inflicted by President John Kennedy's assassin."

As everyone knows, the governor didn't spend much time being purely a patient. Within a few days he had converted the hospital into a "Little Capitol."

Now the Governor is "officiating" in the Mansion, across the street from the big state government complex. His staff is working out of his business office in the Capitol.

People around the Statehouse say that Connally seems to enjoy working under stress. The month he came into office, he was forced to undergo a hernia operation. He ran the executive department from a hospital room then, too, and later from the Mansion.

It will be six months before the doctors know for sure whether Connally will regain full use of his bullet-shattered right arm. It must remain in a heavy cast for 90 days.

He will be unable to see visitors for several weeks.

SMITH PRAISES JOHNSON - In commenting on Gov. Connally's return to Austin Lt. Gov. Preston Smith said "in our grief, we can be thankful for two things: The life of our own governor was spared, and our new president is probably the one man in the country who could have taken hold of the reins of our national government so quickly and firmly."

Smith said he had been assured that President Johnson "will respect the rights and responsibilities of state and local government." He added, "This is a favorable situation in Texas and other states where states' rights are still valued."

WATER-FUN HEARINGS SET

Gov. Connally's Study Committee on Water Recreation has set public hearings in four parts of the state.

They will be held in Abilene on February 3; Dallas, February 4; Houston, February 10; and San Antonio, February 11.

Vice Chairman John Babcock, research and development supervisor for the Lower Colorado River Authority said, "Nine men sitting around a table can't really know what the people want, so we want to hear from the people of Texas." He said sportsmen's groups, as well as private citizens, are invited to testify.

At present about 100 local water authorities - municipalities, water districts and river authorities - have jurisdiction over reservoirs in Texas of 5,000 acre feet or more, but lack legal authority to prescribe water recreation facilities.

Nine state agencies and nine federal agencies play some part in water recreation programming, but there is no central plan. Many have policies which conflict with those of cooperating agencies.

Babcock said, "The Governor's committee will endeavor to pull all efforts into the uniform state plan which can be operated by

state agencies." Minnesota has incorporated all efforts under one agency, and the U.S. Congress is making a move in this direction on the federal level.

SULPHUR RIVER - At the suggestion of the Texas Water Commission, Governor Connally reappointed Lynn Chapman of Sulphur Springs to the Sulphur River Conservation and Reclamation District, and named five new members.

They are Dr. Gaza James of Cooper, Fennell Johnson of Cooper, Truett Peek of Commerce, Jack Coker of Naples and R. J. Mesch of Clarksville.

HISTORICAL NOTE - When the State School Land Board looked over the list of goodfaith claimants at its meeting this week, it noted that one man who claimed 9.59 acres of mesquite-dotted rangeland in Zavala County is the grandson of the man who served as Land Commissioner more than a century ago.

He is Murray G. Smyth Jr., whose grandfather, George William Smyth, was Land Commissioner from 1846 to 1852.

Board also note that their assessors set the value of the Zavala County Land, and other land in that area, at about \$30 an acre, whereas goodfaith claims on land in rich-soil Houston County was set at \$69.50 an acre.

PADRE ISLAND DEED - The red-leather-and-velvet bound parchment deed which conveyed title from Texas to the United States on 90,000 acres of state-owned, submerged land surrounding Padre Island National Seashore Park is on display in the Texas State Library building in Austin.

Land Commissioner Jerry Sadler presented this copy to the State Library and an identical copy to the National Archives in Washington, D. C.

NEWS CENTER - Austin will become a world news center now that a Central Texan has become president.

When the Lyndon Johnsons come home to the LBJ Ranch near Stonewall, Austin will be the news center for the White House correspondents who accompany the President wherever he goes.

Telephone company workmen are beefing up lines to the Johnson Ranch to handle the crush of communications which follows the President.

OLD PHILOSOPHER

Philosopher Has New Banking Idea To Multiply Happiness Twelve Times Over

Dear editor:

Whenever I see something in the paper about newer ideas in banking I always read it, but it always turns out that the new idea is in the techniques, not in the lending practices. They're still based on soundness, which is the main stumbling block for a lot of us.

At any rate, last night I read an article by the president of the American Institute of Banking saying it won't be long before a man will never see his pay check. Instead of handing it to him, the company will send it to his bank for deposit. Then instead of the man having to get a lot of bills through the mail from the stores where he trades and write checks for each one and mail them back, the stores will just notify the bank to charge his account with whatever he owes them. This is the same system the government uses to collect withholding taxes.

This would save millions of people the trouble of writing millions of checks every month, reduce the cost of mail service, check handling at the banks, etc.

I have thought this system over and it sounds all right except for one flaw.

It fails to eliminate the monthly bank statement.

If you stop and think how much trouble it is for a bank to make a bank statement for every one of its customers every month, how much it burdens the mail service, etc., you can see that the American Banking Institute ought to be pushing further ahead on its newer ideas.

It seems to me it could reduce the cost of the present system twelve times by sending statements only once a year. Just don't balance anybody's account until the last week in December, after the Christmas spending is over. This way a man would be depressed only once a year instead of every month. You reduce the sinking feeling a man gets when he gets his bank statement by that much and you've multiplied happiness twelve times over.

Or better still, balance the accounts only once a lifetime and eliminate all worrying.

I don't know how this system would work eventually or who would wind up holding the bag, but I know how bankers will look at it. They'll look at it with a cold stare.

Yours faithfully,

J. A.
